

Organic Moss and Algae Remover Information Sheet

Areas of Use

- For removing all types of algae, moss and lichens from brick, stone, roof tiles, concrete, wood, tarmac, painted surfaces, decking, garden furniture, pavements, plastic and glass.
- Can also be used on fabric awnings (however, check for colour fastness first).
- Ideal for use at home, in the garden, on caravans and boats, at sports facilities, on public walk areas, in farm yards and in kennels and stables.

Key Benefits

- Powerful cleaning agent.
- Eradicates moss and algae safely.
- No more slippery footpaths and walkways.
- Non-toxic – safe for pets and wildlife.
- No preparation – no scrubbing – no rinsing!
- Organic ingredients.

Description

A powerful, non-toxic cleaning agent based on organic acids which remove all types of moss, moulds, algae and lichens. It's very easy to use, just a one step application!

Directions for use:

Application:

- Ideally use when rain is not imminent.
- Dilute 1 part SkilledBuild Organic Moss and Algae Remover to 3 parts water.
- Apply using either a spray, soft broom, paint brush or watering can. Apply evenly to the surface to be treated.
- Moss eradication will begin as product dries – leave for a few days to reach full strength.
- For moss and lichen, the area may need to be soaked thoroughly – lichen may need further applications. Any residue should weather away over a period of time.
- Can also be used for small water features (which contain no living organisms) to deter growth on new or cleaned surfaces. Simply add a teaspoon of SkilledBuild Organic Moss and Algae Remover to the water; increase the dosage for larger features.

Caution: SkilledBuild Organic Moss and Algae Remover will scorch foliage where it makes contact; however, small amounts of run-off should not harm roots. Take care near fish ponds; a few drops entering water will not harm fish or pond life but try to avoid this happening.

Cleaning of Tools:

Plastic implements are recommended for application. Rinse after use and clean metal parts thoroughly to avoid corrosion.

Note: Do not throw rinsing water onto plants/grass.

Organic Moss and Algae Remover Information Sheet

Product Data

Appearance: Green Liquid.

Coverage: 2.5l diluted as per directions will cover up to 60 metre squared (650 square feet) dependent on porosity.

Shelf Life: Up to 24 months when stored according to manufacturer's instructions.

Storage: Store in cool, dry conditions in a sealed container, away from food, animals and children. Protect from frost and direct sunlight.

Important Information

SkilledBuild is committed to development and supply of quality products and may substitute or change product branding or specification or technical data without notice. Always check for latest information.

All information provided is based on practical tests & published data and is intended to guide a competent DIY user or contractor in the typical use of products for minor works but is without guarantee. If a failure of the works will be costly to repair or hazardous then design & execution must be undertaken by competent persons. Further advice should be sort from a suitably qualified advisor. Skilled Build may be able to answer simple product enquiries.

Since application and working and user competence is beyond our control, no liability of the supplier can be derived from the contents of information sheets or other general information provided. Any statements made beyond the contents of SkilledBuild's website or product labels must be confirmed in writing by the supplier.

Disposal of Containers:

Do not leave empty containers where residue could be harmful to children, animals or the environment. Replace lids and remove any containers to a central disposal point in accordance with local regulations or send for recycling.

Safety

- Contains organic acid. Irritant.
- Wear protective gloves, goggles and overalls.
- Do not breathe concentrated vapour.
- Wash any splashes off skin and eyes immediately with plenty of cold water.
- Do not ingest.
- Keep out of reach of children and pets.
- Some people are more sensitive to chemical products than others. If irritation occurs discontinue use and seek medical advice if symptoms persist.
- See separate material safety data sheet for full handling, use and storage.
