Since application and working and user competence is beyond our control, no liability of the supplier can be derived from the contents of information sheets or other general information provided. Any statements made beyond the contents of SkilledBuild's website or product labels must be confirmed in writing by the supplier.

Description

This ready mixed, multi-purpose filler has many uses and is ideal for repairs to all stonework, timber and plaster. It is simple to use, dries white and can be sanded when dry, although this is often unnecessary as the product is extremely smooth.

Directions for use:

Preparation:

- Ensure surfaces to be filled are clean, dry and dust free. If necessary stir before use.

Application:

- Apply in a thin layer using a filling knife or spatula, pressing into cavities.
- If a deeper repair is required, build up the filler in thinner layers.
- For a perfect finish, fill slightly proud of the surrounding surface and use fine sandpaper to blend in the repair.
- Exterior repairs should be protected from weathering. The product must be sealed with an oil based paint or varnish when dry.
- Do not use on surfaces regularly under water.

Cleaning

- Clean tools with water before Filler sets hard.
